

LN-QE-RS35 / LN-QE-RS50 IMAGE MODES

IMAGE MODES IN DAYLIGHT & NIGHTTIME

In daylight, the color enhancing filter is activated.
Choose daytime color mode for brilliant color rendition.

At nighttime, once the IR is activated, the color filter is
automatically disconnected to allow IR light inside the sensor.

Users can choose either Low-Light Color Mode, or a variety of
monochrome image colors like Black & White, NV Green Phosphor,
NV White Phosphor and Amber.
